English

Amaharic

Experience

○ internship
FANA Broadcasting Corporation
IT Officer

During my time at FBC, I was involved in maintaining and troubleshooting computer systems, networks, and software applications. I assisted in setting up and configuring hardware and software, ensuring that all systems were running smoothly. Additionally, I provided technical support to staff members, addressing their IT-related issues and resolving them in a timely manner

○ Blih Marketing & Communications
Web Developer

At Blih Marketing & Communications, I collaborated with a team of skilled professionals who were dedicated to creating innovative and visually appealing websites and systems for clients. I was involved in the entire development process, from gathering client requirements to designing and implementing the websites

Bot Developer

○ As an experienced Telegram bot developer at Blih Marketing and Communication,
I have specialized in utilizing the Telegraf framework to create interactive and feature-rich bots for the Telegram messaging platform.
During my time at Blih Marketing and Communication, I leveraged the powerful capabilities of Telegraf to handle messages seamlessly, parse commands effectively,
and implemented dynamic conversation flows using Telegraf's middleware system.My work experience at Blih Marketing and Communication has equipped me with valuable skills in Telegraf bot development and a deep understanding of how to leverage this framework to create interactive and effective bots for Telegram.

summary

As a computer science graduate, I have a strong foundation in various aspects of computer science and technology. I possess a solid understanding of programming languages . I have experience in database management,, and graphics design Additionally, I am skilled in web development, Along with technical skills, I have strong problem-solving abilities, critical thinking, and attention to detail. With a computer science background, I am well-equipped to adapt to new technologies, learn quickly, and contribute effectively in various roles within the field.
